

Our family listens to K-love radio on a frequent basis. The FCC proposal to expand LPFM may result in the transmitter that carries the K-love signal being forced off the air. K-love provides a much needed and valuable service to Christians throughout the U.S. There are very few local radio stations in existence that offer the type and quality of programming and content that K-love offers. If the proposal to expand LPFM ends up forcing K-love to lose many of its transmitters, the public will be left without the valuable service K-love provides in many communities. Since this issue could affect hundreds of thousands of listeners, I strongly urge you to act in a manner that will not reduce K-love's ability to reach its entire listening audience. Thank you for your consideration.
